PROFESSIONAL SUMMARY

Full Stack Developer with strong knowledge of **Node.js**, **Express.js**, **MongoDB**, and **REST API development**. Skilled in building scalable backend systems, implementing **JWT authentication**, and working with databases using **Mongoose**. Experienced in frontend basics like **HTML**, **CSS**, **JavaScript**, and **React.js**. Comfortable with API testing using **Postman** and version control using **Git** and **GitHub**.

TECHNICAL SKILLS

- **Backend:** Node.js, Express.js, REST APIs, JWT Authentication
 - **Database:** MongoDB, Mongoose, CRUD Operations
 - **Frontend:** HTML, CSS, JavaScript, React.js (Basics)
 - **Tools:** Git, GitHub, Postman
 - **Concepts:** API Integration, MVC Architecture, JSON Handling
 - **Other:** Deployment Basics (Render/Heroku)
-

PROJECTS

AI Resume Analyzer (Full Stack Web Application)

- Developed a full stack resume screening system that compares Resume with Job Description.
- Built backend using **Node.js** and **Express.js**.
- Implemented secure login system using **JWT Authentication**.
- Used **MongoDB** and **Mongoose** to store user reports and analysis history.
- Extracted resume text from PDF using PDF parser.
- Integrated Flask AI microservice to calculate match score using **TF-IDF** and **Cosine Similarity**.
- Implemented Reports Module: view reports, delete reports, and download PDF reports.

- Implemented search, filter, and sorting for reports.
- Added graph visualization using **Chart.js**.

Tech Stack: Node.js, Express.js, MongoDB, Flask, Python, Chart.js, HTML, CSS, JavaScript

Meme Sharing Web Application

- Developed a meme uploading and sharing platform.
- Implemented user authentication and like feature.
- Built REST APIs for meme upload, retrieval, and likes.
- Stored data in MongoDB using Mongoose.

Tech Stack: Node.js, Express.js, MongoDB, HTML, CSS, JavaScript

Consistify - Daily Habit Tracker

- Developed a habit tracking system to maintain daily routines.
- Implemented daily tracking and streak management.
- Designed clean UI and managed user data.

Tech Stack: JavaScript, Node.js, MongoDB

INTERNSHIP / TRAINING

Backend Development Training

- Worked on REST API development using Express.js.
 - Practiced database integration using MongoDB and Mongoose.
 - Implemented authentication using JWT.
 - Tested APIs using Postman.
 - Worked with Git and GitHub.
-

EDUCATION

Bachelor of Computer Applications (BCA) / B.Tech (CS)

(Your College Name)

2022 - 2026

KEYWORDS FOR ATS MATCHING

Node.js Developer, Express.js, MongoDB, REST API Development, API Integration, JWT Authentication, GitHub, Git, Postman, CRUD Operations, Backend Development, Full Stack Web Development, HTML, CSS, JavaScript, React.js, MVC Architecture, Deployment.

DECLARATION

I hereby declare that the above information is true to the best of my knowledge.
